Shoe Rental

Rock shoes make a huge difference! They are specifically designed to optimize your performance. They are constructed with a stiff sole under the toe box that almost makes a platform for you to stand on even if the foothold is very small. This construction combined with the specially formulated and very sticky rubber make rock shoes invaluable to every climber. They should fit tight, your toes should be touching the front of rock shoes. We have rentals in most sizes (kids 11 to mens 15)

Harness Rental

Necessary if you want to use the ropes. We have harnesses to fit pretty much anyone, even full body harnesses for really small Children. We will help you adjust your harness to fit correctly.

Chalk Bag Rental

Not Necessary, but nice to have. Chalk bags are just small bags of chalk that clip to your harness or strap around your waist. As you climb you can keep your hands dry and grippy by coating them lightly with the chalk.
